

Sepehr Behroozi

SENIOR iOS SOFTWARE ENGINEER

Berlin, Germany

sep.behroozi@gmail.com github.com/sepbehroozi linkedin.com/in/sepehrbehroozi Berlin, Germany

SUMMARY

iOS software engineer with more than 10 years of professional experience developing and publishing scalable apps. Highly experienced setting up complex CI/CD for multi-variant apps with millions of users, and in automating the release lifecycle to ship reliable apps to customers. Several years of experience in Swift, with solid, hands-on knowledge of Objective-C.

EXPERIENCE

Delivery Hero SE — Senior iOS Software Engineer Feb 2021 – Present

- Automated the release flow for **9 apps shipping to ~20M monthly active users**, taking the release train from biweekly to weekly using Fastlane, Bash and Swift scripts on Bitrise.
- Lead engineer for error-monitoring standards and alerting; raised crash-free users from **99.7% to 99.95%**.
- Established the **24/7 client on-call rotation** for iOS and Android across verticals, built on top of that monitoring and alerting infrastructure.
- Drove the reduction of app-hang rate across domains, using CPU and Time Profiler, OSLog and OSSignposter to measure and mitigate performance regressions.
- Shipped AI skills and MCP tooling for design-system migration, incident investigation and PR review guidance.

Ayan Co. — Senior iOS Software Engineer Jun 2018 – Feb 2021

- Built payment applications including Ghabzino (utility bill payment inquiries) and Khalafi (traffic fine inquiry and payment).
- Lead developer for the iOS client of the MyTehran app.

Alibaba.ir — iOS Software Engineer Oct 2019 – Dec 2019

Worked on the Alibaba online itinerary app.

Asanbar.ir — iOS Software Engineer Feb 2018 – May 2018

Worked on a freight booking and tracking app.

Dunro — iOS Software Engineer May 2016 – Feb 2018

Worked on a local business discovery and location-based social network app.

SKILLS

Languages	Swift, SwiftUI, Objective-C, Reactive Programming, Swift Concurrency
Release & CI/CD	Fastlane, Bitrise, Bash, multi-variant release automation
Reliability	Error monitoring, alerting, on-call design, crash and app-hang reduction
Performance	Xcode Instruments, CPU and Time Profiler, OSLog, OSSignposter
Also	AI tooling and MCP, high-scale problem solving, cross-team communication

EDUCATION

University of Zanjan — B.Sc. Computer Software Engineering 2010 – 2015
